Your body requires at least 8 mg to function. Lacking zinc-rich animal and plant sources in diet. Doctor recommended supplement.

This report is prepared by geneticists and nutritionists at Mendel's Peas using contemporary molecular genetics and nutrition databases published by government health authorities. A person with no genetic and health risk factors, who adheres to nutrition guides and healthy lifestyles, should score 10/10 for every vitamin and mineral. We have prepared your personalized supplements to address the most significant potential nutrition gaps found in this report.

Keep Improving

As you make improvements in your lifestyle and adjust your habits, your supplements will change with you. Keep us updated by retaking your Lifestyle Test, and we'll update your formulation to always fit your body.
