Magnesium

Lifestyle

SCORE 2/10

The body requires at least 420 mg to function. Severely insufficient based on the amount of whole grains and vegetables in diet.

Iron

Lifestyle

SCORE 10/10

The body requires at least 8 mg to function. Sufficient overall food consumption.

Zinc

Lifestyle

SCORE 10/10

The body requires at least 11 mg to function. Sufficient Zinc-rich animal and plant sources in diet.

This report is prepared by geneticists and nutritionists at Mendel's Peas using contemporary molecular genetics and nutrition databases published by government health authorities. A person with no genetic and health risk factors, who adheres to nutrition guides and healthy lifestyles, should score 10/10 for every vitamin and mineral. We have prepared your personalized supplements to address the most significant potential nutrition gaps found in this report.

Keep Improving

As you make improvements in your lifestyle and adjust your habits, your supplements will change with you. Keep us updated by retaking your Lifestyle Test, and we'll update your formulation to always fit your body.
